

Curriculum Overview – **Science** Year 7

Year	Term	Units of Work	Assessment
7	1	Biology – Cells Chemistry – Particles and their behaviour Physics – Forces	Formative assessment of written work on Cells Formative assessment of written work on Particles and their behaviour Formative assessment of written work on Forces Summative end of Module assessment on all aspects studied
	2	Biology – Structure and function of body systems Chemistry – Elements, atoms and compounds Physics – Sound	Formative assessment of written work on Body systems Formative assessment of written work on Elements, Atoms and Compounds Formative assessment of written work on Sound Summative end of Module assessment on all aspects studied during module 2 along with synoptic elements from earlier in the year.
	3	Biology – Reproduction Chemistry – Reactions, acids and alkalis Physics – Light and space	Formative assessment of written work on Reproduction Formative assessment of written work on Reactions Formative assessment of written work on Light Summative end of Module assessment on all aspects studied during module 3 along with synoptic elements from earlier in the year.
